

# Workshop in Perth

# MBT-C for ASD

**IMAGINA Centre for the Applications of Mentalization and Lifespan Psychology Centre (Perth) are organizing a workshop on working with children with Autism Spectrum Disorder (ASD) from the Mentalization-Based Treatment for Children (MBT-C) model.**

**Dates: July 9 and 10, 2026**

## Program – July 9

An Intervention Model Integrating Neurodiversity and Mentalization Intervention Model Based on MBT-C

## Program – July 10

Clinical Application of the Model  
MBT-C Techniques for ASD  
Working with Parents of Children with ASD  
Working with the School

## Trainer: Norka Malberg, PsyD

PsyD in Psychotherapy, Psychologist, Psychotherapist and Psychoanalyst. Yale Child Study Center, Yale School of Medicine. Anna Freud Centre. Director of IMAGINA Centre for the Applications of Mentalization (Barcelona). She trained at the Anna Freud Centre in London and obtained her PsyD from University College London for her adaptation of MBT to group work with adolescents in a pediatric hospital setting. She is a certified psychotherapist, supervisor and trainer in Mentalization-Based Treatment for children (MBT-C), adolescents (MBT-A) and families (MBT-F). She is one of the co-authors of the Mentalization-Based Treatment for Children model, together with Nick Midgley, Karin Ensink, Karin Lindqvist, and Nicole Muller, who, around the Anna Freud Centre, combined their efforts and expertise to develop this psychotherapy model. She is also the author of the book Working with Parents in Therapy: A Mentalization-Based Approach, published by the American Psychological Association (APA).
